Dropdown cells, like Excel

The cell stays a normal input. The list opens only on that cell, and only items for that sheet.

1 Cell at rest

MISC · Part A Accommodation

Description	Unit	Price
Hotel, twin sharing	night	1,800
Select item v		
Meal allowance	day	350

Arrow only on the description cell.

Unit and price stay read from the list.

2 List open

Accommodation items only

hot v

Hotel, twin sharing	night · 1,800
Hotel, single	night · 2,400
Hotel, crew house	night · 900

Not shown: Diesel, Airfare, Crane.

Those are other categories.

You can still type a special item

if it is not on the list.

3 After the pick

Same row, filled from the list

Description	Unit	Price
Hotel, twin sharing	night	1,800
Hotel, single	night	**2,400**
Meal allowance	day	350

BOL uses the manpower list.

Mobilization uses the miscellaneous list.

The sheet columns do not change.
