Published starter per job type

A new estimate opens on the structure only. The recommended pack drops the usual rows in, so the estimator edits quantities instead of building the list.

CURRENT Wizard ends on an empty breakdown

New cost estimate

Onsite | Shop | Trading

Standard Onsite (with resources)

Creates the groups. No rows yet.

C. TRADING + Add task

No tasks yet. Add a task to start.

RECOMMENDED Wizard opens the released onsite pack

Released pack · Onsite pump overhaul

Version 3 · released 12 Mar · prices as of today

Item	Description	Qty	Unit	Rate
1	Site supervisor	1	day	2,800
2	Mechanical technician	2	day	1,650
3	Helper	2	day	950
4	Chain block 2T	1	day	450
5	PPE set	5	set	180

Mobilization and notes come with the pack. Hidden rows stay collapsed.

Use this pack

Does not replace the sheets. It only fills the first copy of them.

Quantity-only first pass

The full sheet stays. A short entry sits in front of it: pick a known item, type the quantity, and the unit and price come from the masterlist.

CURRENT Every column is filled by hand

BOL · full grid

Description	Unit	Qty	Days	Rate	Amount
type description, unit, qty, days, rate…					
type description, unit, qty, days, rate…					
type description, unit, qty, days, rate…					
type description, unit, qty, days, rate…					
type description, unit, qty, days, rate…					

Five fields per line, even for a known role.

RECOMMENDED Short entry, then the same sheet

First pass · known items only

Mechanical technician — from manpower list — Qty 2 — Days 6

Helper	2 × 6	■950	**■11,400**
Welder	1 × 4	■1,800	**■7,200**
Chain block 2T	1 × 6	■450	**■2,700**

Open full sheet only if the item is not on the list.

Unknown items still open the full row. This does not remove the breakdown.

Repeat-job match

Copy from a previous estimate is a manual search. The wizard should offer the last matching file when the client and job type are the same.

CURRENT Pick a file from the whole list

Start from a previous estimate

- CE-2024-118 Plant A valve
- CE-2025-014 Plant B pump
- CE-2025-077 Plant C trading
- CE-2026-003 Plant A inspection

Strip notes Strip attachments

You have to remember which file was the last one.

RECOMMENDED Last match is offered first

MATCH · PGPC · Onsite · pump

CE-2025-014 submitted ■1.84M Rev 01

Use this, refresh prices

Keep old notes off

Other files

CE-2024-118 same client, different job

CE-2026-003 inspection only

The old notes stay off. Prices refresh from the current list unless you keep them.

Masterlist price lock

Sync can update a row, but the estimate does not say which list it used. The stamp makes that visible, and the update is a choice.

CURRENT Sync is a row button, no list date

Chain block 2T
■450 / day
Sync

Welder
■1,800 / day
Sync

No date. You cannot tell if ■450 is today's price.

RECOMMENDED List date on the estimate, update by choice

Priced on masterlist 10 Mar 2026

2 rows changed since then

Chain block 2T ■450 → ■520
Welder ■1,800 → ■1,850

Keep my prices | Update changed rows

Other rows stay as estimated.

An old estimate does not change until you accept the update.

Mobilization and miscellaneous as packs

The cleaned mobilization and miscellaneous rows live on this estimate only. A pack makes that cleaned layout the start of the next one.

CURRENT Cleaned on this file, blank on the next

This estimate

- Airfare
- Air cargo, international
- Air cargo, domestic
- Roro fare

Next estimate

Airfare only. Cargo and roro are missing again.

Unused admin rows are back.

RECOMMENDED Same cleaned layout opens next time

Mobilization pack · released

Airfare	shown
Air cargo, international	shown
Air cargo, domestic	shown
Roro fare	shown
Hotel	hidden until used

Miscellaneous pack uses the same rule per part.

Hidden rows stay in the pack. They are not deleted.

Crew preset

Roles are added one by one and the rate follows. A preset drops the usual crew, rates, and per diem in one step.

CURRENT One role, then another

Add manpower

Select role…

1 Site supervisor ■2,800

+ Add row

Per diem still empty.

RECOMMENDED One crew, then adjust the days

3-man site crew

Role	Qty	Rate	Per diem
Site supervisor	1	■2,800	■500
Mechanical technician	1	■1,650	■400
Helper	1	■950	■300

Days stay blank for you to fill.

The preset is a shortcut into BOL. The sheet underneath does not change.

Scope sentences

Scope of work is typed, or copied with the old job names still in it. Clauses are ticked, and the client and equipment come from the RCE.

CURRENT A blank scope editor

Scope of work

Type the scope here…

Copied text still says Plant B.

RECOMMENDED Tick the clauses for this job type

Onsite · PGPC · WTF pump

- [x] Mobilize crew and tools to site
- [x] Isolate, dismantle, and inspect the pump
- [ ] Shop repair of recovered parts
- [x] Reinstall and assist commissioning

Names come from the RCE, not from the last file.

A ticked clause can still be edited. It is not a locked paragraph.

Inspection already done

An inspection can be attached, but its findings do not become lines. Accepting a finding adds the suggested row.

CURRENT OIF sits in attachments

Attachments

OIF-014.pdf

Attached. Not used in the estimate.

BOL and BOTE are still empty.

RECOMMENDED Findings offered as lines

From OIF-014

Bearing worn — Accept
Add bearing set

Coupling misaligned — Accept
Add alignment labor

Guard missing — Skip
Add guard, trading

Accepted lines land on the matching sheet.

Nothing is added until you accept it. The inspection file is still attached.

Third-party and allowance preset

Third-party lines and the custom breakdown are added after the sheets. A preset puts the usual ones on the summary without adding them into the unit price.

CURRENT Summary is finished in a second pass

COST ESTIMATE SUMMARY

A Labor	
B Tools	
C Consumables	
D PPE	
Unit price	

Third party and freight still to be added.

RECOMMENDED Usual extras already on the summary

COST ESTIMATE SUMMARY

A Labor	**■82,000**
B Tools	**■14,400**
E Third party	
E.1 Freight	**■6,500**
E.2 Crane	**■9,000**
Unit price	**■96,400**

Freight and crane are shown, not inside the unit price.

The unit price still excludes these. That rule does not change.

Formula stamp

Days per month and benefit rates live in admin. The estimate should show the formula it was priced with, and recalculate only when asked.

CURRENT Admin rates, no mark on the estimate

Admin · formula

Days per month 26

Benefit rate 18%

This estimate

No formula shown. Reopening may use the new rate.

RECOMMENDED Formula shown on the estimate

CE-2026-041

Priced with formula 10 Mar 2026

26 days / month · benefit 18%

Admin is now 22 days / 20%.

Keep this formula

Total stays ■1,842,000 until you recalculate.

Opening an old file does not change its total.
